

Summary

Full-Stack Engineer — 3+ years building scalable real-time systems and secure multi-tenant backends. Skilled in TypeScript, Postgres RLS, WebRTC, AI-powered features, Next.js, and AWS. Designed and shipped horizontally scalable RTC and HLS pipelines, improved backend throughput 45%, and supported 3k+ concurrent users with median latency <200ms (validated via load tests)

Work Experience

- Full-Stack Developer — 3Zero Digital**
Chattogram, Bangladesh | Jan 2025 - Dec 2025
 - Architected worker pools and batched DB writes to increase backend throughput 45% and halve job latency, stabilizing processing under peak load.
 - Designed and launched RAG + MCP AI features for automated triage and auto-responses, reducing internal support workload ~25%.
 - Scaled realtime APIs to support 3,000+ concurrent users with median latency <200ms (validated with k6 load tests).
 - Improved reliability and reduced MTTR 35% by adding structured logging, tracing, and production rate limiting.
 - Delivered a conversion-focused UI using Next.js and shadcn/ui that increased key flow conversion by 12% via data-driven A/B testing.
- Freelance Full-Stack Engineer**
Mar 2023 - Dec 2024
 - Delivered end-to-end systems for multiple clients: secure backends, modern frontends, and optimized DB schemas. Focus areas: authentication, realtime features, and performance tuning.

Selected PROJECTS

- Social Match-Making Video Chat Reels (Monorepo)..... [Live Link](#) | [Code](#)**
- Engineered a horizontally scalable RTC system using WebRTC, Socket.io, and Redis Pub/Sub, integrating an event-driven Kafka/PostgreSQL pipeline to achieve sub-100ms message acknowledgment.
 - Architected an AWS ECS/FFmpeg HLS pipeline for seamless video streaming alongside a Neo4j graph database to power relationship-based discovery and matching.
 - Implemented JWT session auth and Redis-backed rate limiting, optimizing performance through batched DB writes and an integrated OpenAI SDK chatbot
- Multi-Vendor E-Commerce (Monolithic)..... [Live Link](#) | [Code](#)**
- Built a secure Next.js 16 platform using Drizzle ORM and PostgreSQL RLS to ensure strict multi-tenant data isolation at the database level.
 - Guaranteed data integrity by implementing Database Transactions for atomic order processing, inventory sync, and secure Cryptomus crypto payments.
 - Engineered an Admin Dashboard with real-time delivery tracking and multi-channel notifications, improving efficiency by 20%

Core SKILLS

Languages & Frameworks: TypeScript, Python, Next.js, React-Native, NestJS, Fastify, GraphQL.
Data & DB: PostgreSQL (RLS), Drizzle ORM, Redis, MongoDB, Neo4j, Pinecone, Qdrant.
Infra & Messaging: Docker, AWS (VPC, ECS, EC2, Lambda, S3, CloudFront), Terraform, Kafka, RabbitMQ, NGINX, Cloudflare Workers & CDN.
Auth & Security: JWT/JWKS, OAuth, RBAC, ABAC, Zod, Passport.js.
Realtime & Streaming: WebRTC, Socket.io, HLS, FFmpeg.
AI / Tools: RAG, Vector DBs, OpenAI SDK, LangGraph.
DevOps / Observability: GitHub Actions, Prometheus/CloudWatch, Structured Logging, CI/CD, Linux.
Methodologies: Event-Driven Architecture, SOLID, KISS, Agile.

EDUCATION

- Master of Science in Computer Science & Engineering**, International Islamic University Chittagong — 2026 (Expected)
- Bachelor of Science in Computer Science & Engineering**, Port City International University — 2023
 - Thesis:** Gender Predictions of Bengali Names: An Ensemble and BERT-based Approach.
