

Full-stack engineer (3+ years) specializing in scalable, real-time systems with Next.js, NestJS, event-driven architectures, and PostgreSQL RLS. Delivered sub-200ms APIs for 3k+ concurrent users and ~40% throughput gains, while maintaining a 730+ day coding streak (Jan 2024–Present).

Work Experience

- Full-Stack Developer — 3Zero Digital**
Chattogram, Bangladesh | Jan 25 - Dec 25
 - Improved backend throughput by 40% by redesigning worker pool and queue processing; cut average job processing time from 85 ms → 50 ms.
 - Integrated AI features (RAG & MCP) that reduced internal support workload by ~25% through automated triage and auto-responses.
 - Designed and delivered APIs and real-time flows supporting 3,000+ concurrent users with median request latency <200 ms.
 - Implemented structured logging, rate limiting, and performance tuning that improved system reliability by 35% (fewer incidents, reduced MTTR).
 - Built polished Next.js UI flows with shadcn/ui, reducing client-side errors and improving conversion on key journeys (A/B tested, 12% uplift).
- Freelance Work**
Mar 23 - Dec 24
 - Delivered end-to-end solutions, including scalable backend systems, modern front-end interfaces, and optimized database schemas for multiple clients.

SKILLS

Languages & Frameworks: TypeScript, Go, Python, Next.js, React, NestJS, Fastify, FastAPI.
Data & DB: PostgreSQL (RLS), Drizzle ORM, Redis, MongoDB, Neo4j, Pinecone, Qdrant.
Infra & Messaging: Docker, AWS (VPC, ECS, EC2, Lambda, S3), Terraform, Kafka, RabbitMQ, NGINX, Cloudflare Workers.
Auth & Security: JWT/JWKS, OAuth, RBAC, ABAC, Zod, Passport.js.
Realtime & Streaming: WebRTC, Socket.io, HLS, FFmpeg.
AI / Tools: RAG, Vector DBs, OpenAI SDK, LangGraph.
DevOps / Observability: GitHub Actions, Prometheus/CloudWatch, Structured Logging, CI/CD.
Methodologies: Microservices, Event-Driven Architecture, SOLID, KISS, Agile.

PROJECTS

- Social Match-Making Video Chat Reels (Monorepo)..... [Live Link](#) | [Code](#)**
 - Pioneered real-time communication features utilizing Fastify with REST API integrations, GraphQL APIs, and Socket.io, resulting in a 25% reduction in average latency across the social platform's features.
 - Engineered HLS pipeline on AWS ECS using FFmpeg; optimized video processing throughput to handle thousands of concurrent streams.
 - Created matchmaking engine in Neo4j; added Kafka + Redis for presence and event distribution.
 - Implemented session-based JWT auth with Redis caching, rate limiting, batched DB writes, and AI chatbot via OpenAI SDK.
- Multi-Tenant E-Commerce (Micro-Service)..... [Live Link](#) | [Code](#)**
 - Designed multi-vendor platform: NestJS + Next.js + FastAPI, PostgreSQL with RLS per tenant.
 - Implemented event-driven saga with transactional outbox and compensating actions; used JWKS for stateless auth and robust webhook handling for crypto payments.
 - Deployed services inside AWS VPC with gRPC inter-service comms and personalized vector search for recommendations.

EDUCATION

- M.Sc. in CSE** | International Islamic University Chittagong | Expected Completion: 2026
- B.Sc. in CSE** | Port City International University | Completion: 2023
 - Thesis:** Gender Predictions of Bengali Names: An Ensemble and BERT-based Approach.

LANGUAGES

Bangla: Native English: Professional working proficiency. Hindi/Urdu: Comfortable.
