Chattogram, Bangladesh

Full-stack developer with 3+ years of experience designing distributed systems and building high-quality front-end experiences with React and Next.js. Strong background in real-time communication, event-driven architectures, and AI-powered features. Committed to delivering scalable, reliable, and user-focused systems through clean engineering practices.

Work Experience

- Full-Stack Developer — 3Zero Digital
- Chattogram, Bangladesh | Jan 25 - Dec 25
- Improved backend throughput by 40% using distributed workers and optimized queue processing.
 - Integrated AI features (RAG, MCP) that reduced internal support workload by ~25%.
 - Delivered APIs and real-time flows supporting 3k+ concurrent users with sub-200ms latency.
 - Built polished UI flows using React.js/Next.js and shadcn/ui, improving usability and reducing client-side errors across key user journeys.
 - Increased system reliability by ~35% through structured logging, rate limiting, and performance tuning.
- Freelance Work
- Mar 23 - Dec 24
- Delivered end-to-end solutions, including scalable backend systems, modern front-end interfaces, and optimized database schemas for multiple clients.

SKILLS

Front End Development: TypeScript, React.js, Next.js, TailwindCSS, Redux-Toolkit/Zustand, Tanstack Query, ShadCn, 21st.dev, Framer-motion, GSAP.

Back End Development: Node.js, NestJS, GraphQL, Redis, Drizzle ORM, PostgreSQL (RLS), MongoDB, Socket.io, WebRTC (P2P), Stripe/Crypto integration, LangGraph, Monorepo (Turborepo), MCP Server.

Additional Skills: RAG, Vector Databases (Pinecone, Qdrant), Neo4j (Graph DB), Elysia.js, Python, Go.

Authentication/Authorization: BetterAuth, Zod(Validation), Passport.Js, OAuth, JWT/JWKS (Stateless & Stateful), RBAC, ABAC.

Methodologies: Microservices Architecture, Event-Driven Systems, Agile, SOLID, KISS.

DevOps, Version Control and Deployment: Docker, NGINX, Linux, Shell-Scripting, Kafka, RabbitMQ, Git, GitHub Actions, AWS (VPC,EC2,S3,ECS,Lambda), Cloudflare(Workers,R2), Terraform.

Analytics & Creative Tools: N8N, Pandas, MS-Office, Figma, ReCharts, Matplotlib, GIMP, DaVinci.

Soft Skills: Consistent, Hard Working, Quick Learner, Attention to Detail.

PROJECTS

- Social Match-Making Video Chat Reels (Monorepo)..... [Live Link](#) | [Code](#)
- Built a scalable social platform using Next.js + Fastify with RestAPI, GraphQL APIs, and Socket.io, WebRTC for real-time features.
 - Implemented HLS video processing using AWS ECS + FFmpeg and P2P video calls using WebRTC.
 - Developed a matchmaking engine using Neo4j graph queries.
 - Added Kafka + Redis for real-time chat, presence tracking, and event distribution.
 - Integrated Stripe for premium features and built an AI chatbot using OpenAI SDK
 - Engineered session-based JWT auth with Redis, rate limiting, batched DB writes, notification pipelines.
- Multi-Tenant E-Commerce (Micro-Service)..... [Live Link](#) | [Code](#)
- Designed a multi-vendor platform using NestJS (Fastify.js) + Next.js + FastAPI, backed by PostgreSQL (RLS) for secure tenant isolation (ongoing).
 - Implemented an event-driven saga using transactional outbox + compensating actions, JWKS-based stateless auth, crypto payments with webhook handling, and personalized vector search.
 - Developed a recommendation engine and optimized order flows using distributed workers.
 - Designed gRPC inter-service communication and deployed the system inside an AWS VPC.

EDUCATION

- M.Sc. in CSE | International Islamic University Chittagong | Expected Completion: 2026
- B.Sc. in CSE | Port City International University | Completion: 2023
- Thesis: Gender Predictions of Bengali Names: An Ensemble and BERT-based Approach.

LANGUAGES

Bangla: Native

English: Professional working proficiency.

Hindi/Urdu: Comfortable.
